

In re Appl. No. 08/875,916

have now been amended or rewritten to overcome the rejection based upon indefiniteness.

With respect to the term "quasi electrostatic potential difference", this term means that the potential difference is similar to an electrostatic potential difference, i.e., that the difference functions in the same way as an electrostatic potential difference even though, strictly speaking, it is not exactly an electrostatic potential difference.

The disclosure is objected to because certain cited numerals are now found in the drawings. Accordingly, submitted herewith are amended drawings with the numerals shown in red pencil.

It is noted that the prior art made of record and not relied upon is merely considered to be pertinent to applicant's disclosure.

In view of the above, it is respectfully submitted that the claims are now in condition for allowance, and favorable action thereon is earnestly solicited.

Respectfully submitted,

BROWDY AND NEIMARK, P.L.L.C.
Attorneys for Applicant(s)
